

Pakz

Coffee Equipment Cleaner

Cleans brew basket and server in one simple step. Filter-paper packets allow "brew-in-place" use. Blue indicator dye for safety and proper rinsing. NSF-Certified for metal compatibility and safety.

Directions

To use these Pakz cleaning packets, place one packet in the brew basket and add the server you want to clean in the brew position below. Each packet creates up to 1.5 gallons of cleaning solution. Run the full brew cycle into the server and hold the solution there to soak. After soaking, discard the cleaning solution from the server and return to the brew position. Discard the cleaning packet and return the brew basket to the brewing position. Run the brew cycle again, at least once, to rinse away the residue of the cleaning solution. Rinse any other parts and pieces before returning your brewer to use. Note that, if you wish, the cleaning solution created during the cycle can be used to clean additional servers and to wipe spray heads clean.

Precautionary Statements

Prevention: Wash hands, forearms and face thoroughly after handling. Wear protective gloves, eye protection. If on skin: Wash with plenty of water. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
